### Dear Shareholders and Parties Interested in Geratherm Medical,

Geratherm Medical was able to report a strong business performance during the first quarter of 2017. The sales volume increased by +14.0 % compared to the same period last year. Profits exhibited a significantly stronger growth.

After having to offset a strong increase in costs over the course of the last year, including investments in new employees in almost all segments, we managed to generate an adequate performance on the basis of the increased capacities during the first quarter of 2017. The operating result was considerably higher than the level attained last year. The gross margin of the total operating revenue was 68.9 % (2016: 62.5 %).

The EBITDA margin increased to 20.9 % (2016: 13.3 %). The operating result (EBIT) was EUR 1.004 million during the first quarter of 2017 (2016: 444 kEUR). The financial result was -114 kEUR (2016: -93 kEUR). The result from ordinary business activities amounted to 890 kEUR (2016: 351 kEUR). The shareholders' result after taxes was 621 kEUR for the first quarter (2016: 237 kEUR) or EUR 0.13 per share (2016: EUR 0.05).

## Sales development

Geratherm reported a considerable sales growth in all regions, except for the Middle East. The regions that exhibited the most dynamic development in sales during the first quarter were the USA (+57.1 %) and South America (+53.6 %). Sales on the important European market increased by +9.5 %. Even on the German market, we managed to record a significant increase in sales of +36.0 %. The sales in Other countries rose by +2.0 %. All in all, 82.4 % (2016: 85.2 %) of Geratherm products were exported.

## Sales by regions 01/01 - 31/03/2017

In particular, the growth in sales in the Cardio/Stroke and Respiratory segments, which reported an above-average sales trend, contributed to the considerable growth in sales.

The Healthcare Diagnostic segment, which primarily distributes clinical thermometers, blood pressure monitors and women's healthcare products internationally to pharmacies and drugstores, reported a +13.8 % jump in sales. We experienced a strong demand for our gallium-filling clinical thermometers (+21.2 %) and digital clinical thermometer (+17.0 %). The sales of blood pressure monitors increased by 6.7 %. The Healthcare Diagnostic segment accounted for 64.6 % of the overall sales generated by the Geratherm Group (2016: 64.7 %).

#### Sales by segments 01/01 - 31/03/2017

The Respiratory segment, in which we offer products for testing pulmonary function, also reported a healthy +20.1 % growth. The sales growth was supported by first-time sales on the Chinese market and a good sales performance on the South American market.

Segment sales in the Medical Warming Systems business unit was weaker again for the first three months and posted a 15.0 % drop. Besides Geratherm's good overall situation, this segment's development currently does not meet our expectations. That is due to the new regulatory requirements placed on Medical Warming Systems, which currently prevent the delivery of Geratherm's warming systems. The sales posted by LMT Lübeck, which were integrated in this segment, were not able to offset the decrease.

The Cardio/Stroke segment managed to continue its growth course, recording a 62.2 % increase. We are confident that the apoplex technology will be used in more than 100 clinics in Germany in a reasonable period. We will step up our international expansion efforts over the next two years. In this context, we are happy to announce that we were able to gain the Basel-based Eckenstein-Geigy-Stiftung as a new co-partner of apoplex medical on 13 April 2017. The Swiss Eckenstein-Geigy-Stiftung (foundation) assumed 9.1 % of the shares by way of a capital increase in the amount of EUR 2 million and shall noticeably expand the necessary network of contacts in addition to bolstering the company's capital.

### Earnings situation

The earnings level increased considerably during the first quarter. With an EBITDA margin of 20.9 % and an EBIT margin of 16.2 % we are currently well above our target margins. We assume that we will be able to maintain this level even over the next few months.

The gross margin of the overall performance amounted for the first three months to 68.9 % (2016: 62.5 %). The increasing sales posted by apoplex had a positive effect here, which due to the large software share has a relatively low material share and thus has a positive impact of the Group's gross profit margin.

The gross profit (EBITDA) was EUR 1.296 million (2016: 724 kEUR). The write-offs increased slightly to 292 kEUR (2016: 280 kEUR).

The operating result (EBIT) was EUR 1.004 million (2016: 444 kEUR). Of the financial result in the amount of -114 kEUR, the interest charges of the Geratherm do Brasil subsidiary accounted for 106 kEUR. The result from ordinary business activities for the first three months amounted to 890 kEUR (2016: 351 kEUR).

Income taxes amounted to 230 kEUR (2016: 108 kEUR). A surplus of 659 kEUR (2016: 243 kEUR) was reported as the consolidated earnings for the first three months.

The net result generated for shareholders of the parent company amounted to 621 kEUR (2016: 237 kEUR) for the first three months of the current business year. The result per share for the first quarter was EUR 0.13 (2016: EUR 0.05).

### **Net assets and financial situation**

Geratherm Medical enjoys a favourable asset situation. The balance sheet total of EUR 28.9 million is essentially formed by equity capital in the amount of EUR 21.9 million. The equity-to-assets ratio as of the reporting date was 75.6 % (2016: 74.0 %). The return on equity amounted to 11.4 % (2016: 4.3 %).

As of 31 March 2017 the company had cash, cash equivalents and securities in the amount of EUR 12.3 million (2016: EUR 14.1 million). Thus, the company has a healthy financial position, particularly in light of the planned growth in sales and possible acquisitions.

The long-term assets amounted to EUR 4.5 million (2016: EUR 4.8 million). Major shifts in the development of long-term assets were not noted. The short-term assets in the amount of EUR 24.4 million increased slightly by +3.3 %. Inventory volumes decreased by -3.1 %. The accounts receivable and other assets increased by +19.0 % to EUR 4.6 million in light of the higher sales. The cash and cash equivalents available as at 31 March 2017 amounted to EUR 8.9 million (2016: EUR 9.5 million).

The gross cash flow for the first three months amounted to EUR 1.290 million (2016: 756 kEUR). The cash flow from business operations was 9 kEUR (2016: 202 kEUR). The cash flow from investments amounted to -351 kEUR (2016: -954 kEUR).

### **Research and development**

Our research and development activities focused primarily on Warming Systems, Respiratory and apoplex.

## Staff

The Geratherm Group had a staff of 198 persons in total as of 31 March 2017 (2016: 194) with 177 employees in Germany.

## Outlook

We anticipate for the 2<sup>nd</sup> quarter that the Geratherm Group will continue to develop favourably. The new product areas push Geratherm to a new level of profitability and higher sales. The measures necessary for boosting productivity at the location in Thuringia have been taken.

This year's annual general meeting will take place on Tuesday, 6 June 2017, at 1:30 PM in the "Grandhotel Hessischer Hof", in Frankfurt am Main. We are looking forward to maintaining dialog with our shareholders.

## Notes on Interim Consolidated Financial Statements for the Period from 1 January 2017 to 31 March 2017

### Accounting and Valuation Methods

The interim consolidated financial statements of Geratherm Medical AG were prepared for the three months of the 2017 business year in accordance with the rules of the International Financial Reporting Standards (IFRS) valid on the date of the financial statements and in consideration of the guidance provided by the International Financial Reporting Interpretations Committee (IFRIC), as is mandatory in the European Union.

The accounting, evaluation and consolidation principles were maintained, as shown in the Notes to Consolidated Financial Statements for 2016 Fiscal Year.

The valuation of assets and liabilities is based in part on estimates and/or assumptions about future developments. For instance, the statements on economic useful lives for long-term intangible and tangible assets are based on estimates and assumptions. In addition, the assessment of the recoverability of deferred taxation allocated to the losses carried forward, the long-term decline in value from the fair valuation of assets available for sale and the impairment tests of the cash-generating units and the assets is based on the corporate planning, which of course involves uncertainties such that the actual values may deviate from the made assumptions and estimates in individual cases. Estimates and the underlying assumptions are regularly checked and evaluated with regard to possible impact on accounting.
